2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

JOSEPH MATILDA JOHN

- Use Deep Learning
- Use a Machine Learning Model
- Collecting existing ECG patters
- Finding abnormalitess in ECG pattern
- a two dimensional (2-D) convolutional neural network (CNN) model for the classification

MEERA REESHMAN P

- Using CNN
- Using Mobile application
- Finding the common pattern of Arrhythmia
- Spectral imaging
- A system fixed with the ECG machine.

JERSHA J

- Training the ML model with existing dataset
- Using an automatic detection equipment
- Getting medical history of patient
- Classification based on predefined criteria
- A system which scans and uses the ECG pattern

LAEVI JERISHA A

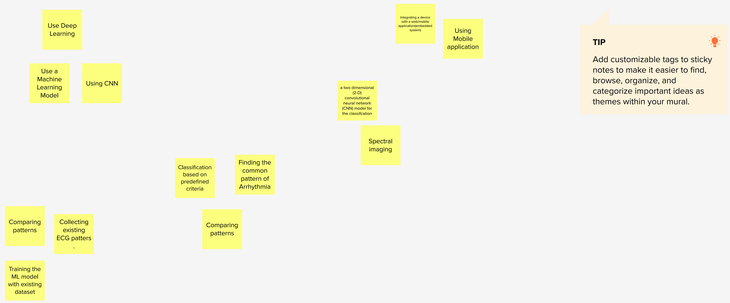
- Using a suitable equipment
- Getting symptoms details from patient
- Comparing patterns
- Comparing results with physical diagnosis for surety.
- Integrating a device with a electronics application/embedded system)

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes



TIP

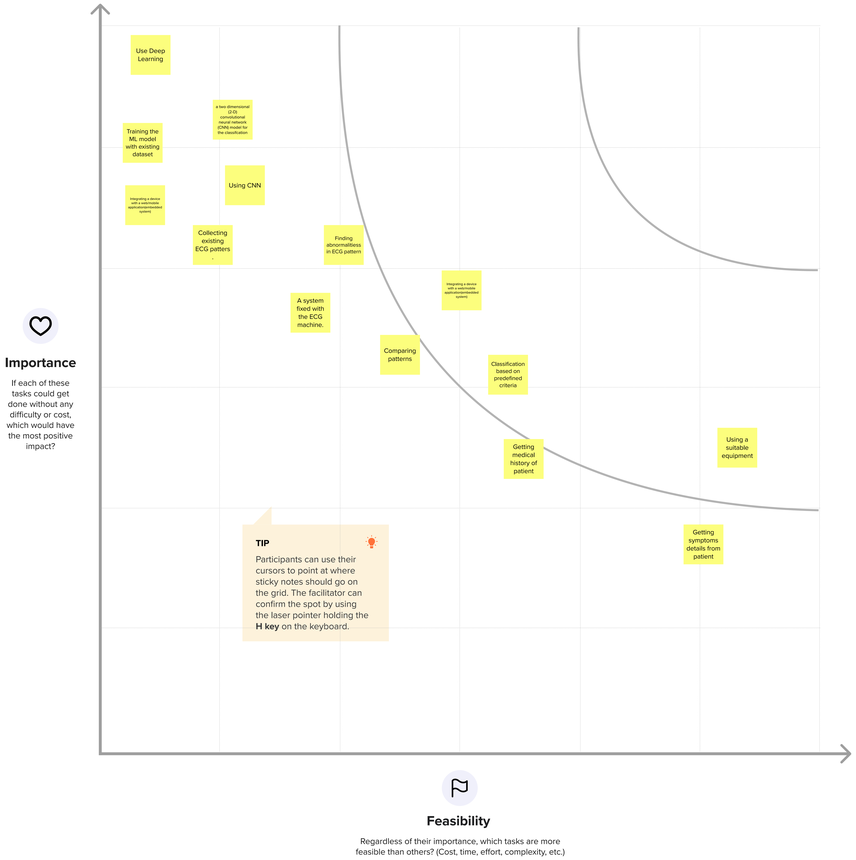
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes



TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.
